TITLES AND SUBJECTS

Data Processing

"Data Collection Systems—Part II: Environmental Effects on Accuracy," William A. Smith, Jr., January, p. 24.
"Computerized Line of Balance Technique," Harry P. Levitt, February, p. 61.
"Skills Inventory System Utilizing the Optical Coincidence Principle," Robert H. Noble, February, p. 85.
"A Method for Measurement and Analysis of Supervisory Work," John M. Geisel, April, p. 175.
"Reducing the Table Size for Square Root Lookup Under a Specified Maximum Error" (Technical Note), Richard F. Bloom, May, p. 253.
"A Computerized Model for Office Layout," T. E. Vollmann, C. E. Nugent, and R. L. Zartler, July, p. 321.
"Computer Scheduling and Control Systems for Discrete Part Production," C. L. Moodie and D. J. Novotny, July, p. 336.
"Computer-Driven Displays," Corwin A. Bennett, July, p. 348.
"Auditing Computer Records," Jon Cary Findlay, October, p. 484.

Decision Theory

"Repair Versus Replacement of Failed Components," W. R. Abbott, January, p. 21.
"Methods for Quantifying Risk in Economic Analyses of Capital Projects," John R. Canada and Harrison M. Wadsworth, January, p. 32.
"Merging Marketing Strategy Selection and Production Scheduling: A Higher Order Optimum," Matthew F. Tuite, February, p. 76.
"Minimizing Round-Off Errors" (Technical Note), George L. Nemhauser, June, p. 306.
"On Warranties" (Technical Note), James M. Lowerre, July, p. 359.
"Some Considerations in Sensitizing an Optimization Model," Joel S. Demski, September, p. 463.
"Simulation in Capital Investment Decisions," Lawrence J. Clarke, October, p. 495.

Design

"Industrial Engineering in the Rehabilitation of the Handicapped," E. R. Tichauer, February, p. 96.
"Optimization by Geometric Programming," Charles S. Beightler, Robert M. Crisp, Jr., and Wilbur L. Meier, Jr., March, p. 117.
"The Future of Machine Tool Automation—A Laboratory Sneak Preview of the Expected Transition from N/C to D/C," David D. Bedworth, March, p. 144.
"Specials Can Be Profitable," David Wilder Brown, June, p. 288.
"The Role of Modeling in IE Design," Salah E. Elmaghraby, June, p. 292.
"The Elemental Time Monitor—A Trial Marriage Between Electronics and Work Measurement," Victor Ardon, July, p. 342.
"Computer-Driven Displays," Corwin A. Bennett, July, p. 348.
"Job Design: From Research to Application," Dale M. Smith, October, p. 477.
"Practical Applications of Statistical Design of Experiments," A. R. Pennell, October, p. 488.
"Integrated Computer Systems," J. T. Weissenburger and B. B. Flachsbart, November, p. 546.

Documentation

"Computerized Line of Balance Technique," Harry P. Levitt, February, p. 61.
"Loading Techniques for the Multiproduct Assembly Line," Ralph Nissen, Larry Kallem, and Paul Christianson, May, p. 243.
"Auditing Computer Records," Jon Cary Findlay, October, p. 484.

Dynamic Programming

"Determination and Standard Sizes to Be Manufactured Using Dynamic Programming," D. M. Jackson and D. R. Zerbe, August, p. 401.

Economics

"MEVOP: A Method for Measuring the Economic Value of Production—One Company's Experience," Charles D. Hoyt, Jr., April, p. 186.
"The Industrial Engineer's Responsibility in the Control and Analysis of Capital Expenditure," J. R. Frost, May, p. 226.
"On Warranties" (Technical Note), James M. Lowerre, July, p. 359.
"Determination and Standard Sizes to Be Manufactured Using Dynamic Programming," D. M. Jackson and D. R. Zerbe, August, p. 401.

"Simulation in Capital Investment Decisions," Lawrence J. Clarke, October, p. 495.

Engineering Economy

"Guidelines for Preparing Cost Savings Evaluations," E. K. Hedrick, January, p. 12.
"Criteria for Investment in Handling Systems," James M. Apple, January, p. 16.
"Methods for Quantifying Risk in Economic Analyses of Capital Projects," John R. Canada and Harrison M. Wadsworth, January, p. 32.

Facilities Planning

"The Use of a Computer in the Development and Control of Warehousing," Edward R. Zebrowski, January, p. 38.
"Simulation Model for Vocational Educational Facility Planning," Donn A. Carter, Alan Colker, and James Leib, February, p. 68.
"A Cost-Effectiveness Approach to Facilities Layout," Roy D. Harris and Roland K. Smith, June, p. 280.
"A Computerized Model for Office Layout," T. E. Vollmann, C. E. Nugent, and R. L. Zartler, July, p. 321.
"Wagon Wheels and Aerospace: A Hub-Wheel Facilities Concept," N. A. Friedman, November, p. 554.

Forecasting

"Progress Function Models and Their Deviations," John H. Russell, January, p. 5.
"Workload Balancing and Inventory Minimization for Job Shops," George Schussel, April, p. 194.
"An Introduction to Short-Term Forecasting," Douglas C. Montgomery, October, p. 500.
"A Management Information System for Production Cost Control and Procurement Cost Prediction," Ernest J. Joss and Jack I. Dahl, November, p. 529.

Human Factors

"Data Collection Systems—Part II: Environmental Effects on Accuracy," William A. Smith, Jr., January, p. 24.
"Industrial Engineering in the Rehabilitation of the Handicapped," E. R. Tichauer, February, p. 96.
"Operations Research in the Solution of Air Traffic Control Problems," Matthew Rosenshine, March, p. 122.
"Human Transmission of Numbers and Letters," Stephan Konz, E. Braun, K. Jachindra, and D. Wichlan, May, p. 219.
"The Additivity of Elemental Times," Ravinder Nanda, May, p. 235.
"Computer-Driven Displays," Corwin A. Bennett, July, p. 348.
"An Analytical Model of Worker Performance in Incentive Situations," Norman R. Baker, August, p. 394.
"A Physiological Evaluation of Time Standards for Strenuous Work as Set by Stopwatch Time Study and Two Predetermined Motion Time Data Systems," Nicholas J. Aquilano, September, p. 425.
"Job Design: From Research to Application," Dale M. Smith, October, p. 477.
"A Fair Day's Work Is Anything You Want It to Be," Bertram Gottlieb, December, p. 592.

Information Theory

"Human Transmission of Numbers and Letters," Stephan Konz, E. Braun, K. Jachindra, and D. Wichlan, May, p. 219.

Inventory Control

"Workload Balancing and Inventory Minimization for Job Shops," George Schussel, April, p. 194.
"Reducing the Table Size for Square Root Lookup Under a Specified Maximum Error" (Technical Note), Richard F. Bloom, May, p. 253.
"Inventory Control with Random and Regular Replenishment," Arthur P. Hurter and Frank C. Kaminsky, August, p. 380.
"A Multilocation Inventory Model" (Technical Note), R. W. Skeith, December, p. 630.

Job Evaluation

"Skills Inventory System Utilizing the Optical Coincidence Principle," Robert H. Noble, February, p. 85.
"Objective Effort Level Estimates in Manual Work," David A. Thompson and Phillip B. Applewhite, February, p. 92.
"A Method for Measurement and Analysis of Supervisory Work," John M. Geisel, April, p. 175.
"Utility Concepts and Statistical Methods in Job Evaluation," George P. Huber and K. Jayachandran, May, p. 247.
"Non-Computerized Technical Manpower Inventory," D. G. Boulanger, July, p. 330.
"Performance Standards for the Non-Manual Non-Repetitive Activity?," Robert J. Paul, December, p. 612.
"Assembly Line Balancing—A Heuristic Algorithm for Variable Operator Performance Levels," E. M. Mansoor, December, p. 618.

Labor Relations

"Skills Inventory System Utilizing the Optical Coincidence Principle," Robert H. Noble, February, p. 85.
"A Determination of Requirements: Personnel for a Technical Organization," Kemper W. Baker, September, p. 449.

Maintenance

"Repair Versus Replacement of Failed Components," W. R. Abbott, January, p. 21.

Materials Flow and Handling

"Criteria for Investment in Handling Systems," James M. Apple, January, p. 16.
"A Cost-Effectiveness Approach to Facilities Layout," Roy D. Harris and Roland K. Smith, June, p. 280.
"A Computerized Model for Office Layout," T. E. Vollmann, C. E. Nugent, and R. L. Zartler, July, p. 321.
"A Heuristic Approach for Solving the Delivery Problem," Frank A. Tillman and Harold Cochran, July, p. 354.

Measurement

"Objective Effort Level Estimates in Manual Work," David A. Thompson and Phillip B. Applewhite, February, p. 92.
"A Case Study Comparison of Independent Channels Versus a Combined Pool," Hamdy A. Taha, March, p. 137.

"Improved Weight Control on Volumetric Packing Lines," Peter W. Stack and Philip F. Humbaugh, June, p. 285.
"Specials Can Be Profitable," David Wilder Brown, June, p. 288.
"Computer Scheduling and Control Systems for Discrete Part Production," C. L. Moodie and D. J. Novotny, July, p. 336.
"A Heuristic Approach for Solving the Delivery Problem," Frank A. Tillman and Harold Cochran, July, p. 354.
"Machine-Tool by Digital Computer—A Laboratory Example," David D. Bedworth, August, p. 373.
"PAC—Performance Analysis and Control," Takeji Kadota, August, p. 407.
"Effect of Prior Experience on Learning Curve Parameters" (Technical Note), Thomas R. Hoffmann, August, p. 412.
"The Line of Balance—A Management by Exception Tool," Efraim Turban, September, p. 440.
"A Determination of Requirements: Personnel for a Technical Organization," Kemper W. Baker, September, p. 449.
"A Simplified Planning Scheme for the Manufacturer with Seasonal Demand," J. F. C. Close, September, p. 454.
"Toward the Development of a Complete Multiproject Scheduling System," L. G. Fendley, October, p. 505.
"A Stimulation Solution of a Transportation Scheduling Problem," Guy L. Curry and Allen C. Schuermann, Jr., November, p. 550.
"A Management Information System for Production Cost Control and Procurement Cost Prediction," Ernest J. Joss and Jack I. Dahl, November, p. 529.
"Assembly Line Balancing—A Heuristic Algorithm for Variable Operator Performance Levels," E. M. Mansoor, December, p. 618.

Quality Control

"Repair Versus Replacement of Failed Components," W. R. Abbott, January, p. 21.

"The Multicharacteristic Control Chart," P. M. Ghare and Paul E. Torgersen, June, p. 269.

"On Warranties" (Technical Note), James M. Lowerre, July, p. 359.

"Practical Applications of Statistical Design of Experiments," A. R. Pennell, October, p. 488.

"Hypergeometrically Computed LTPD Sampling Planner," Glen D. Self, December, p. 608.

Queueing Theory

"Operations Research in the Solution of Air Traffic Control Problems," Matthew Rosenshine, March, p. 122.

"A Case Study Comparison of Independent Channels Versus a Combined Pool," Hamdy A. Taha, March, p. 137.

"Priority Dispatching in the Single Channel Queue with Sequence-Dependent Setups," Kenneth R. Baker, April, p. 203.

"The Effect of Three Switching Rules on Queueing Networks," Ralph L. Disney and James J. Solberg, December, p. 584.

Simulation

"Progress Function Models and Their Deviations," John H. Russell, January, p. 5.

"The Use of a Computer in the Development and Control of Warehousing," Edward R. Zebrowski, January, p. 38.

"Simulation Model for Vocational Educational Facility Planning," Donn A. Carter, Alan Colker, and James Leib, February, p. 68.

"A Computerized Model for Office Layout," T. E. Vollmann, C. E. Nugent, and R. L. Zartler, July, p. 321.

"Machine-Tool Control by Digital Computer—A Laboratory Example," David D. Bedworth, August, p. 373.

"Simulation in Capital Investment Decisions," Lawrence J. Clarke, October, p. 495.

"Toward the Development of a Complete Multiproject Scheduling System," L. G. Fendley, October, p. 505.

"A Simulation Solution of a Transportation Scheduling Problem," Guy L. Curry and Allen C. Schuermann, Jr., November, p. 550.

Systems

"Optimization by Geometric Programming," Charles S. Beightler, Robert M. Crisp, Jr., and Wilbur L. Meier, Jr., March, p. 117.

"Operations Research in the Solution of Air Traffic Control Problems," Matthew Rosenshine, March, p. 122.

"The Challenge in Physical Distribution," Alfred Opengart, April, p. 167.

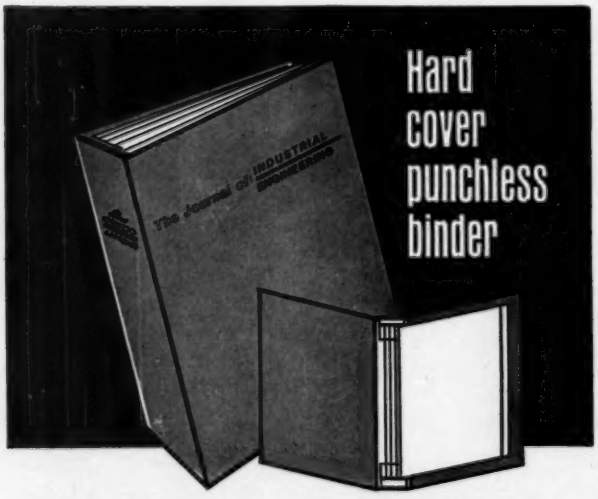
"Specials Can Be Profitable," David Wilder Brown, June, p. 288.

"The Role of Modeling in IE Design," Salah E. Elmaghraby, June, p. 292.

"Computer Scheduling and Control Systems for Discrete Part Production," C. L. Moodie and D. J. Novotny, July, p. 336.

"Toward the Development of a Complete Multiproject Scheduling System," L. G. Fendley, October, p. 505.

"A Management Information System for Production Cost Control and Procurement Cost Prediction," Ernest J. Joss and Jack I. Dahl, November, p. 529.



As a service to our readers, this binder is now available from AIIE headquarters

Each binder, constructed of heavy duty binder's board, holds 12 issues of the magazine.

The cost per binder is $3.75 which includes postage and handling in North America. Foreign postage is $.50 per binder additional. Order now from AIIE, 345 East 47th Street, New York, New York 10017. Allow 3 weeks for shipping. Payment must accompany order.

Reprints Available—

INDUSTRIAL ENGINEERING TERMINOLOGY MANUAL

$.50 per copy for first 100 copies

and

$.25 per copy for each copy in excess of 100

Order From—

American Institute of Industrial Engineers
345 East Forty-Seventh Street
New York, New York 10017
